

CLEARFIELD® Winter Wheat Seed Production Protocol

October 24, 2008

Beyond Application:

- Rate per acre: 6.0 oz/acre
- Treat entire field with Beyond herbicide
- Recommended wheat application timing: min. 1 tiller wheat and max. jointing
- Apply to actively growing wheat and weeds
- Avoid applications when the day temps are below 40 F
- Avoid applications when prolonged below freezing temperatures are predicted
- Ground Applications: 10+ gpa @ 20-40 psi
- Aerial Applications: 5+ gpa
- Add Nonionic Surfactant @ 1qt/100 gallons
- 1.0-2.5 gallons of 32% nitrogen fertilizer solution or 28% solution per 100 gallons of spray solution or 12-15 lbs of AMS per 100 gallons of spray solution
- Fluid fertilizer applications can be applied with Beyond up to 50% of the application volume.
- Tank mix or sequential partners - Bronate, Buctril, Clarity, Curtail, MCPA (Amine + Ester), Starane, & 2,4-D (Amine + Ester)
- Tank mixes with SU herbicides (Harmony Extra, Express, Ally, Finesse, Amber, etc) are prohibited
- Provide applicator with a copy of the BEYOND label

Spray Equipment Management

- Thoroughly clean equipment used to spray CLEARFIELD® wheat before and after application of Beyond herbicide.
